

Technical Datasheet

Oak T Pro Caps

Presentation

Pine T Pro Caps is a concentrated formulation of microparticles containing the sex pheromone of the oak processionary moth, *Thaumetopoea processionea*.

Composition of the formulation:

This formulation is an aqueous formulation, containing biosourced and biodegradable materials such as sun flower oil, packaged in syringes.

Each syringe contains 3 mg of the active ingredient as well as inert ingredients:
Antioxidant

System Specification:

Name: Oak T Pro caps

Active ingredient common name: 11Z,13Z-Hexadecadien-1-yl acetate

CAS: 66410-24-0

Content: 1 mg of pheromone mixture, stabilizer.

How to use it?

The pheromone formulation packaged in a syringe should be placed in the dedicated receptacle of the trap before the emergence of the insect and until the end of the season.

Remove the syringe stopper and push the piston to release the pheromone formulation inside a monitoring trap.

Dispose the empty syringe away from the monitoring area

The specific trap should be hung to the trees in the canopy.

How to handle it?

Oak T Pro is made in a very safe to handle dispenser.

It contains no hazardous material.

Its packaging is designed to prevent direct contact with the product.

Storage conditions:

The formulation must be kept in a cool well-ventilated area in its original packaging, at a temperature < 30°C. Under these conditions it may be stored for **30 months**.

Monitoring

Insects counting should occur weekly and more often when insect population pressure is high.

Replacement

Dispensers don't need to be replaced as they are effective for **3 months**.
